BRIDGES

◆ SAFE ACCESS

- Personnel and plant to site
- Floating fall arrest
- Temporary walkways or ferry systems
- Anti-collision zones

◆ BRIDGE SURVEYS & MAINTENANCE

We provide a complete floating workstation ensuring surveyors and engineers have a safe, stable platform for inspections on water. Our pontoons are scaffold compatible, have numerous mooring options and can be configured around existing piles and structures. We will work with you to generate a structured timetable during multi-site operations to ensure efficient use of human resources.

◆ DEMOLITION

A floating pontoon is an excellent platform to collect falling debris and eliminate risk of pollution to water courses. For aerial works floating fall arrest systems are also easily achieved. Our modular pontoons are easily deployed as versatile barges to ferry hoppers of waste to shore.

◆ NEW BUILDS

From the smallest of projects to the 'Twin Sail Bridge' in Poole our services provide a vast range of solutions for accessing the water.
