FLOATING ACCESS

◆ VERSATILE SOLUTIONS

Whatever your requirement we can provide a solution, floating walkways, towpath diversions, work platforms of all shapes and sizes for a wide variety of projects and locations.

◆ WORKING ON ALL LEVELS

With a floating platform you can work safely from the water. We have various types of hand railing and barriers available and the modular pontoons can facilitate a site specific design, increasing efficiency and enabling you to work with confidence.

Scaffold towers can be attached for aerial access, or the pontoons can be used as a work platform to assemble and manoeuvre equipment or sub structures into position. Our solutions will also enable full pedestrian access and transport light vehicles.

We can provide a low profile system for working closer to the water with a free board of only 22cm or accommodate much larger projects with steel pontoon.

◆ FLOATING WELFARE / OFFICE / STORES

Temporary units can be put on the water when space for your compound is limited. This can be welfare units, office space or stores for your equipment.
