PEDESTRIAN AND LIGHT VEHICLE ACCESS

◆ FLOATING WALKWAYS AND ROAD WAYS

Why let water get in the way of access? A temporary floating bridge can pull two sites together, increasing opportunities for parking or enlarging your site. Suitable for pedestrians, site buggies, 4x4s, emergency vehicles and tailored for disabled access. Stability and safety are paramount and you will not find a better service.

◆ PUBLIC SAFETY

We are forging our own standards of best practice within the framework of the Health and Safety at Work Act 1974. Our recommendations adhere to NEBOSH guidelines for sites with public access and are reinforced by our in-house training. We provide a comprehensive service with minimum environmental disturbance.

◆ DISABLED ACCESS

We have provided disabled access for many large scale events; the adaptability of our system along with an inventory of ramps and walkways means we can provide a slick solution to awkward terrains.
