# PLANT

## ◆ SAFE SOLUTIONS

Whatever the size and weight, working with plant around water often poses huge problems and can be extremely hazardous, access is usually an issue and even the smallest delay can be costly when working to tight deadlines.

## ◆ BESPOKE SOLUTIONS

Our modular pontoon is a versatile solution to the challenges of plant access. With floating platforms supporting machinery from 100kgs up to 20 tonnes, our comprehensive bespoke service caters for all of your needs. Safety is paramount so whether your project requires single deck, double deck or steel platform support we can provide the solution. The secret of any plant evolution is ensuring that the point loading of the equipment is understood; the loading of heavy plant is evenly distributed by covering the pontoon surface with a range of tracking. We understand the risks involved and always supply a modular pontoon system that will have a minimum of a 50% load to buoyancy.

## ◆ OUTSTANDING SERVICE

Pontoonworks has an ongoing commitment to health and safety and works closely with the HSE as we forge our own codes of practice. Our team will arrive with all the relevant tickets for site work with high safety standards enforced by our NEBOSH trained managers. Together with up to date vehicle service documents and high quality PPE our strong health and safety culture ensures a smooth induction process and knowledgeable on-site service. Our outstanding level of service guarantees whatever the water access issues are, we can provide the solution.
