PUMP PLATFORMS AND MOON POOLS

◆ FABRICATION

Working with your engineers and our newly developed stress package we can ensure a safe and stable solution for a wide variety of pumps, lifting equipment and machinery. We can also design fixings to secure plant directly to the pontoon.

◆ PERMANENT

This type of installation is usually required for larger scale projects and the pontoons provide an excellent housing for pumps, pipes and ancillary equipment making access and maintenance a simple process. However, the ease of deployment and recovery makes our system equally suitable for short or long term hire.

◆ LOCATIONS

Quarries, lagoons and holding tanks have their inherent dangers due to changes in viscosity and pH. We have dealt with most situations from working with clients at Beckton Sewerage, British Sugar, various quarries and other treatment works.
